DETAILED ACTION

Response to Amendment

1. The Applicant's Amendments and Accompanying Remarks, filed January 6, 2006, have been entered and have been carefully considered. Claims 1 and 9 are amended, claims 1 – 7 and 9 – 15 are pending. In view of Applicant's filed terminal disclaimer, the double patenting rejection over US 6,698,251 has been withdrawn as set forth in the previous Office Action. In view of Applicant's arguments regarding the double patenting rejection over US 6,684,46, the Examiner withdraws the double patenting rejection as set forth in the previous Office Action. In view of Applicant's amendments omitting the term "inelastic" from the claims, the Examiner withdraws the 35 USC 112, 1st paragraph rejection as detailed in the previous Office Action. The invention as currently claimed is not found to be patentable for reasons herein below.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claims 1 and 9 remain rejected under 35 U.S.C. 102(b) as being anticipated by Deignan et al. (US 5,768,758). The details of the rejection can be found in paragraph 7 of the previous Office Action. The rejection is maintained.

Claim Rejections - 35 USC § 103

4. Claims 2 – 7 and 10 – 15 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Deignan et al. (US 5,768,758). The details of the rejection can be found in paragraph 8 of the previous Office Action. The rejection is maintained.

Response to Arguments

5. Applicant's arguments filed January 6, 2006 have been fully considered but they are not persuasive.

Applicant argues that Deignan does not teach integrally knitting the base layer and patterned layer. It should be noted that Deignan teaches a raschel crochet knitted fabric comprising two layers (see column 6, lines 45 – 67). The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same or an obvious variant from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the Applicant to show unobvious differences between the claimed product and the prior art product. *In re Marosi*, 218 USPQ 289, 292 (Fed. Cir. 1983). The Applicant notes that if the product of Deignan is integrally knitted that would leave no room for inserting the cord which is integral to the invention of Deignan. The Applicant has not provided evidence to support the argument.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
